

Drawing Lines and Curves

Freehand tool

Drawing and adjusting a path	1 Select freehand tool.	2 Drag.	3 To erase, hold \mathbb{H} key.	4 Release mouse button.	5 Result:

Auto trace tool

Tracing a template shape	1 With a template open, select auto trace tool.	2 Position pointer on edge of template.	3 Click.	4 Result:	

Pen tool

Drawing straight lines	1 Select pen tool.	2 Click.	3 Click.	4 Click.	5 Click.
Drawing curves	1 Select pen tool.	2 Click and drag.	3 Click and drag.	4 Click and drag.	5 Click and drag.
Creating corners	1 Select pen tool.	2 Click.	3 Click.	4 Press Option key and drag.	5 Release Option key.
Changing from curves to lines	1 Select pen tool.	2 Click and drag.	3 Click and drag.	4 Press Option key and click.	5 Release Option key and click.

Editing Paths

Splitting paths

Splitting a path and deleting a segment	1 Select scissors tool.	2 Click to split segment.	3 Click.	4 Select segment and delete.	5 Result:

Adding and deleting anchor points

Adding and deleting an anchor point	1 Select add-anchor-point tool.	2 Click to place a new point.	3 Select delete-anchor-point tool.	4 Click anchor point to delete.	5 Result:

Converting direction points

Converting between corners and curves	1 Select convert-direction-point tool.	2 To convert corner to curve: position pointer on anchor point.	3 Press and drag.	4 To convert curve to corner: click on anchor point.	5 Result:
Converting between smooth points and corner points	1 To convert smooth point to corner point: select curve.	2 Select convert-direction-point tool.	3 Drag direction point.	4 To convert corner point to smooth point: click on direction point.	5 Result:

Connecting endpoints

Averaging and connecting two endpoints	1 Select endpoints.	2 Choose Average from the Arrange menu.	3 Choose Join from the Arrange menu.	4 Result:

Modified By: Lucy Flack

Instant Update Questions and Answers

Who is Instant Update for?

Instant Update is for anyone who needs to spend more time working with the input from his teammates and less time chasing down the input from them.

It's different because it's the first software to recognize that you don't work alone.

While other applications focus on allowing the individual to generate output in the form of documents, spreadsheets, and graphs, Instant Update allows individuals to gather information together from other individuals.

What's the main benefit of Instant Update?

Black change bars indicate changes by another participant.

Grey change bars indicate changes you made since you last updated.

action immediately --
